PHI Learning 0. Softcover. Book Condition: New. 5th or later edition. 18 x 24 cm. Description: This book is an introduction to semiconductor devices for undergraduate electrical engineers, other interested students, and practicing engineers and scientists whose understanding of modern electronics needs updating. The book is organized to bring students with a background in basic physics to a level of understanding that will allow them to read much of the current literature on new devices and applications. The book has two goals: 1. To provide students with a sound understanding of existing devices, so that their studies of electronic circuits and systems will be meaningful and 2. To develop the basic tools with which they can later learn about newly developed devices and applications. Contents: PREFACE ABOUT THE AUTHORS 1.
