Managing Water for All: An OECD Perspective on Pricing and Financing

By -

Organization for Economic Cooperation & Development. Paperback. Book Condition: New. This item is printed on demand. Paperback. 148 pages. Water is a key prerequisite for human and economic development, and for maintaining ecosystems. However, billions of people lack access to water and sanitation services, mainly due to poor governance and inadequate investment and maintenance. This report, which emphasises the economic and financial aspects of water resources management and water service provision, the need for an integrated approach (including governance considerations) to address these complex policy challenges, and the importance of establishing a firm evidence base to support policy development and implementation, summarises the results of OECD work in this area. Table of Content : Executive Summary -The benefits of strategic financial planning for water supply and sanitation -Tariffs: Reconciling different policy objectives -How to best harness the capabilities of public and private actors for water supply and sanitation services -Economic instruments to promote sustainable water use for agriculture Introduction Chapter 1. Setting the Stage -The economic backbone of water policies -Current water policy challenges -The evolution of the policy debate -Annex 1. A1. Projected Expenditures on Water and Wastewater Services -Annex 1. A2. A Brief History of International Conferences on...
