CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 11.0in. x 8.5in. x 0.1in.The goal of this technical review is to examine critical issues of care coordination for children with special health care needs. It is intended to supplement the more comprehensive Evidence-based Practice Center (EPC) report on care coordination currently under preparation. Experts in the field such as Perrin and colleagues and Stein have described in detail the requirements for providing coordinated care for children with complex medical needs. In addition, professional organizations such as the American Academy of Pediatrics and a variety of advocacy groups and service programs for families with children with special health care needs have developed care coordination strategies and developed very useful guidance materials regarding this issue. These sources, while embracing general principles of care coordination that are relevant for all populations and age groups, emphasize those elements of care that are of particular importance for children with special health care needs. Although quite varied, they tend to be due to (1) the dependence of children on parents or other adult caretakers; (2) the distinct epidemiology of childhood and its implications for the organization of health services; (3) the developmental nature of child health problems and the need to link care with educational institutions; and (4) the special financial basis for child health and related services. The inherent dependence of children on adults acting on their behalf adds a level of complexity to care coordination efforts in that the facilitation, monitoring, and at times the enforcement of this proxy function must always be incorporated into coordinative programs for children. The most important distinctive characteristic of the epidemiology of childhood is that unlike in the elderly, serious chronic illness is relatively rare. This requires that specialized...
