Example: how much glass will be required for 6 windows, each 5 feet 8 inches high, and 3 feet two inches broad 4. Masons work comprehends all sorts of stone work; and it is measured by the foot, superficial or solid, according to its na--nature. Blocks of marble or stone, columns, walls, and c. are measured, by the foot solid: pavements, chimney-pieces, and c. by the foot superficial. Solid measure is used for materials, and superficial for workmanship. In solid measure, the length, breadth, and thickness, are multiplied together for the contents: in superficial measure, the length and breadth of each part are taken, whether on a plain surface, or projecting from the upright face of the building. All windows and doors are deducted from the contents of the walls, for the materials only: but the value of tire workmanship is included in the charge at the given rate. pxample 1. llcqnired the solid contents of a stone wall 256 feet long, 16 feet 8, inches high, and 2 feet Q inches thick, at 4 medium. Solidity, ft. 12088 4 5. Painters work is measured like that of joiners and carpen fers, by girting over the mouldings and swelling pannels, in taking the height, because wherever the brush and the colour. have gone, and labour has been employed, a compensation ought to be made to the workman. The dimensions are taken in feet and...
