This approach gives students the foundation they need to understand the logic behind program design and to establish effective programming skills. Fully revised, the Fourth Edition offers students a lively and accessible presentation as they learn core programming concepts -- including data types, control structures, data files and arrays, and program design techniques such as top-down modular design and proper program documentation and style. Problem-solving skills are developed when students learn how to use basic programming tools and algorithms, which include data validation, defensive programming, calculating sums and averages, and searching and sorting lists. A copy of the RAPTOR flow-charting software is included with the Fourth Edition 525 pp. Englisch.
